Troy Systems Gym Mirror Installation | Print Instructions

How to Install your Troy Systems Gym Mirror

- Take your gym mirror out of the packaging.
- Use the cardboard as a cushion to protect your glass during installation.
- Clean the wall where the mirror will be installed, so the mirror glue cures properly.
- Use a level and mark every 16-18 inches on the wall for the bottom of the J-bar.
- Place the J-Bar (bottom-support) just above the marked lines.
- Mark 4 large holes ensuring equal distances, included the large holes on either ends of the J-Bar.
- Drill 4 EZ anchors into the wall where you made your marks.
- Line up the J-Bar with the EZ anchors and insert 4 screws through the holes.
- Place the setting blocks in the J-Bar, 1/4 of the way in from the end of the J-bar.
- Carefully place the mirror inside the J-Bar to make the marks for the clips.
- Detach both sides of the round mirror clips.
- Make marks for drilling by tracing the inside of the round mirror clips.
- Carefully remove the mirror from the J-Bar. First lift, then pull the mirror out.
- Drill holes for the mirror clips with a 3/16" drill bit.
- Place the plastic anchors into the holes.
- Apply Mirror Glue 3/4" thick by 2"-3" wide directly on the glass back of the mirror.
- Slightly angle and insert the mirror in the J-Bar, then press it towards the wall.
- Screw in your mirror clips into the anchor to fasten the mirror to the wall.

Congratulations! You have successfully installed your Gym Mirror.
